TransHospital®

AIRBUS

Mobile System for Top Quality Medical Care

TransHospital® is a solution to deploy and support military and disaster relief missions.

TransHospital® brings major surgical capability closer to the front lines than ever before. Instead of evacuating patients over long distances, medical teams can locate a custom field hospital directly where it is needed. It is equivalent to Echelon II or II+*.

*Level II : Increased medical capability and limited inpatient bed space.

Characteristics

Shelters	6-15
Tents	10-15
Manpower	30-50
Patients	50-100
Timing	2 hours

Extended Functions

TransHospitals® expands the mobile Rescue Station to include a broader range of treatment options and therapies.

In addition to more comprehensive surgical interventions, TransHospital® also has facilities to stabilize patients until medical evacuation takes place. The staff can also tackle life saving and major surgical procedures.

Surgical Facility

Depending on the volume of patients and the medical requirements, Transhospital® may have adequate facilities to perform operations on non-life-threatening wounds or injuries. Caring for patients from initial diagnosis through recovery, the staff can expect to deal successfully with complications resulting from infection, and to repair wounds without lasting disfigurement.

Key References

- German armed Forces is the main customer, with more than 500 units delivered by Airbus as the prime contractor
- Other customers: USA, United Arab Emirates, Spain, Slovenia, Libya, Singapore, Indonesia, Thailand

For All Medical Disciplines

The treatments performed range from basic surgical operations on extremities to shock treatment, neurosurgery, burn treatments and skin grafts as well as major operations on organs. In addition to facilities for a wide variety of specialties such as ear, nose and throat, dentistry, urology and gynecology, the hospital houses a range of laboratories from food chemistry to microbiology are performed by the Mobile Field Hospital (equivalent to echelon III*)

*Level III : The highest level of medical care available within the combat zone.

Key Benefits

- Airbus is the leading system provider for mobile medical systems in the world:
 - > 25 years of experience
 - > 500 units delivered
- Independence of shelter and/or subsystems/components allows for support of local workshare and regional sourcing
