Fortion[®] SuRVIn

Product Suite for
Intelligence, Surveillance
and Reconnaissance

AIRBUS

Fortion® SuRVIn

Fortion® SuRVIn is a field-proven ISR (Intelligence, Surveillance and Reconnaissance) product suite for real-time situational awareness. Fortion® SuRVIn detects, locates, identifies and tracks air, maritime and ground objects. Collection, processing, analysis and provision of information and intelligence ensures decision superiority to every level of operations and command.

Key Features

- Covering the Intelligence Cycle: planning, collection, processing, analysis and dissemination
- Real-time collection and automatic correlation/ fusion of data
- Generation of a Common Operational Picture (COP)
- International standards and interfaces (e.g. NATO STANAGs)
- Easy integration of various sensors (Radar, IFF, ELINT, COMINT, ADS-B, AIS, Data Links, GMTI, SAR, IR, Image and Video...)
- Cloud-based, scalable approach, multi-level redundancy and load-balancing
- Easily extendible Service Oriented Architecture (SOA)

Airborne Strategic ISR

Surveillance aircraft – Boeing B707 and B737

Key reference

NATO AWACS and Boeing AEW&C

Tactical/Operational ISR

Surveillance drone – NG Global Hawk

Key reference

NATO AGS

Countrywide Surveillance

Key reference

Undisclosed European customers

Key Benefits

- Superior situational awareness under real-time conditions
- Usable on airborne, ground and surface platforms (e.g. aircraft, trucks, ships or deployable shelters) and distributed ground surveillance systems (Combat Cloud)
- Can be used to interconnect various platforms and systems and to share situational picture
- Scalable from countrywide networked system to single software suite modules
- Robust, easy to maintain and highly portable
- Interoperable due to standard NATO interfaces
- Serves as a JISR hub
- Accredited by and introduced into NATO
- ITAR free
